

Escheating Checks

All unclaimed warrants/checks should be escheated based on legislation passed by the North Carolina General Assembly. Each agency is responsible for the escheat of unclaimed checks, which appear on their check reconciliation report. A new law, enacted during the 1999 session by the North Carolina General Assembly, changed the dormancy holding period for unclaimed funds and abandoned properties. Unclaimed funds held by governmental agencies are now escheatable after one year.

For further details concerning the new law, refer to the following SIG link, http://www.osc.state.nc.us/sigdocs/sig_docs/sigProcessing_Payments.html, to view a memo from the State Treasurer's Office concerning "Annual Reporting Forms for Filing Escheat and Unclaimed Property". For escheat laws and forms, refer to the North Carolina State Treasurer's web site at www.treasurer.state.nc.us.

The escheat process outlined below is used for all checks on the North Carolina Accounting System (NCAS).

1. Access the NCAS Accounts Payable (AP) module.

```

OC9 AP                ACCOUNTS PAYABLE                APM

Invoice Creation

After a check number is selected on *PES* for processing, an invoice is automatically generated during the nightly production. If multiple checks are selected for escheat on *PES*, a separate invoice is generated for each check. The invoice number is used to identify each escheated check. ES is displayed in the first two positions, followed by the BAP code and check number of the check being escheated. An example of the invoice number is ES14D000000234. These invoices are paid out of each agency's trade pay entity to vendor 561545517 D, which is the State Treasurer's escheat and unclaimed property.

An example of the invoice is displayed below:

OC9 AP	INVOICE MAINTENANCE 1	IMW-1T

Account Mini-chart Indicators

Each invoice will include a special mini-chart indicator (ESH) for escheats, which creates the following entries:

<i>Entries from invoice:</i>	DR	XX01	211960	9999
	CR	XX01	211960	9999

The escheat liability account should be reconciled to ensure it maintains a zero balance. No cash or CMCS entries are necessary. There is no effect on cash because the check for the Treasurer's Office replaces the original check.

The payment due date for each invoice is the same as the date the check is processed on *PES*. A check is produced, as normal, in the nightly production based on the *Bank Cycle Controls (BCC)* and *Payment Entity Cycle Controls (PCC)* screen parameters set by the agency.

After processing the check on *PES*, the status is changed from “OPEN” to “ESCHEATS”. This status change can be viewed on the *Payment List (PYL)* screen. The CLEARANCE DATE is the date the escheat is processed on *PES*.

An example of the *PYL* screen is displayed below:
